

- Multiple “navigational” aids are provided to help you get around the night sky faster and easier:
  - ★ Charts are arranged by decreasing right ascension.
  - ★ Chart pages are tabbed by declination band and keyed to Finder Charts for quick lookup (Volumes 1 and 2).
  - ★ The right ascension and declination extent of each chart is displayed in large bold type in the right hand chart legend.

- ★ All constellations on the chart are listed in decreasing area in large bold type in the right hand chart legend.
- ★ Contiguous chart numbers are displayed around the perimeter of each chart.
